Mela Touch On Cream

Target hidden melanin inside the skin!

#vitamin_cream
#brightening_to_the_inside

Powerful brightening effect from 6 vitamins and antioxidant network

Diligent brightening care is necessary to treat pigmentation, like freckles and blemishes, caused by external irritants and skin tone change due to aged cells.
Mela Touch On Cream features 6 vitamins including Glutathione, which treats skin tone without irritation through the antioxidant network. Retaining homeostasis of skin barrier and moisturizing skin to the inside, PHA treats melanin and gets you radiance and bright complexion.
Mela Touch On Cream also protects the skin from blue light and UV to prevent recurrence of pigmentation and sustains its diligent brightening care day and night for your skin radiance.
